MEET YOUR AESTHETIC DOCTOR

ABOUT ME

"My experience in dentistry and Maxillofacial training has exposed me to treating patients in a range of emergency and acute situations.

My interest in Facial Aesthetics developed from this full-face approach to dealing with trauma and a deep understanding of the facial anatomy."

Medical Treatments at HC MedSpa are by our Experienced & Trusted Aesthetic Doctors

It is important to me that our patients feel comfortable enough with us to speak freely about why they want facial aesthetics treatments and importantly trust us to guide them through their journey."

PLEASE NOTE: We take a £50.00 Security Deposit for your consultation, this is redeemable against your treatment or refundable should you to not go ahead.

ANTI-WRINKLE INJECTIONS

At HC MedSpa, we provide anti-wrinkle injections to relax these muscles, stopping them from contracting and forming notable lines and wrinkles. These treatments have been used by doctors for many years and are a consistent means for reversing the signs of ageing.

What are anti-wrinkle injections?

Anti-wrinkle injections temporarily weaken the muscles that gather your skin into folds, making them crease-proof enough to prevent wrinkles becoming established.

Is the treatment safe?

All our cosmetic injections are safe, effective and FDA (Food and Drug Administration) approved. The MDU (Medical Defence Union) will only insure doctors who use FDA approved products this provides further assurance that you will be in extremely safe hands.

Is the treatment painful?

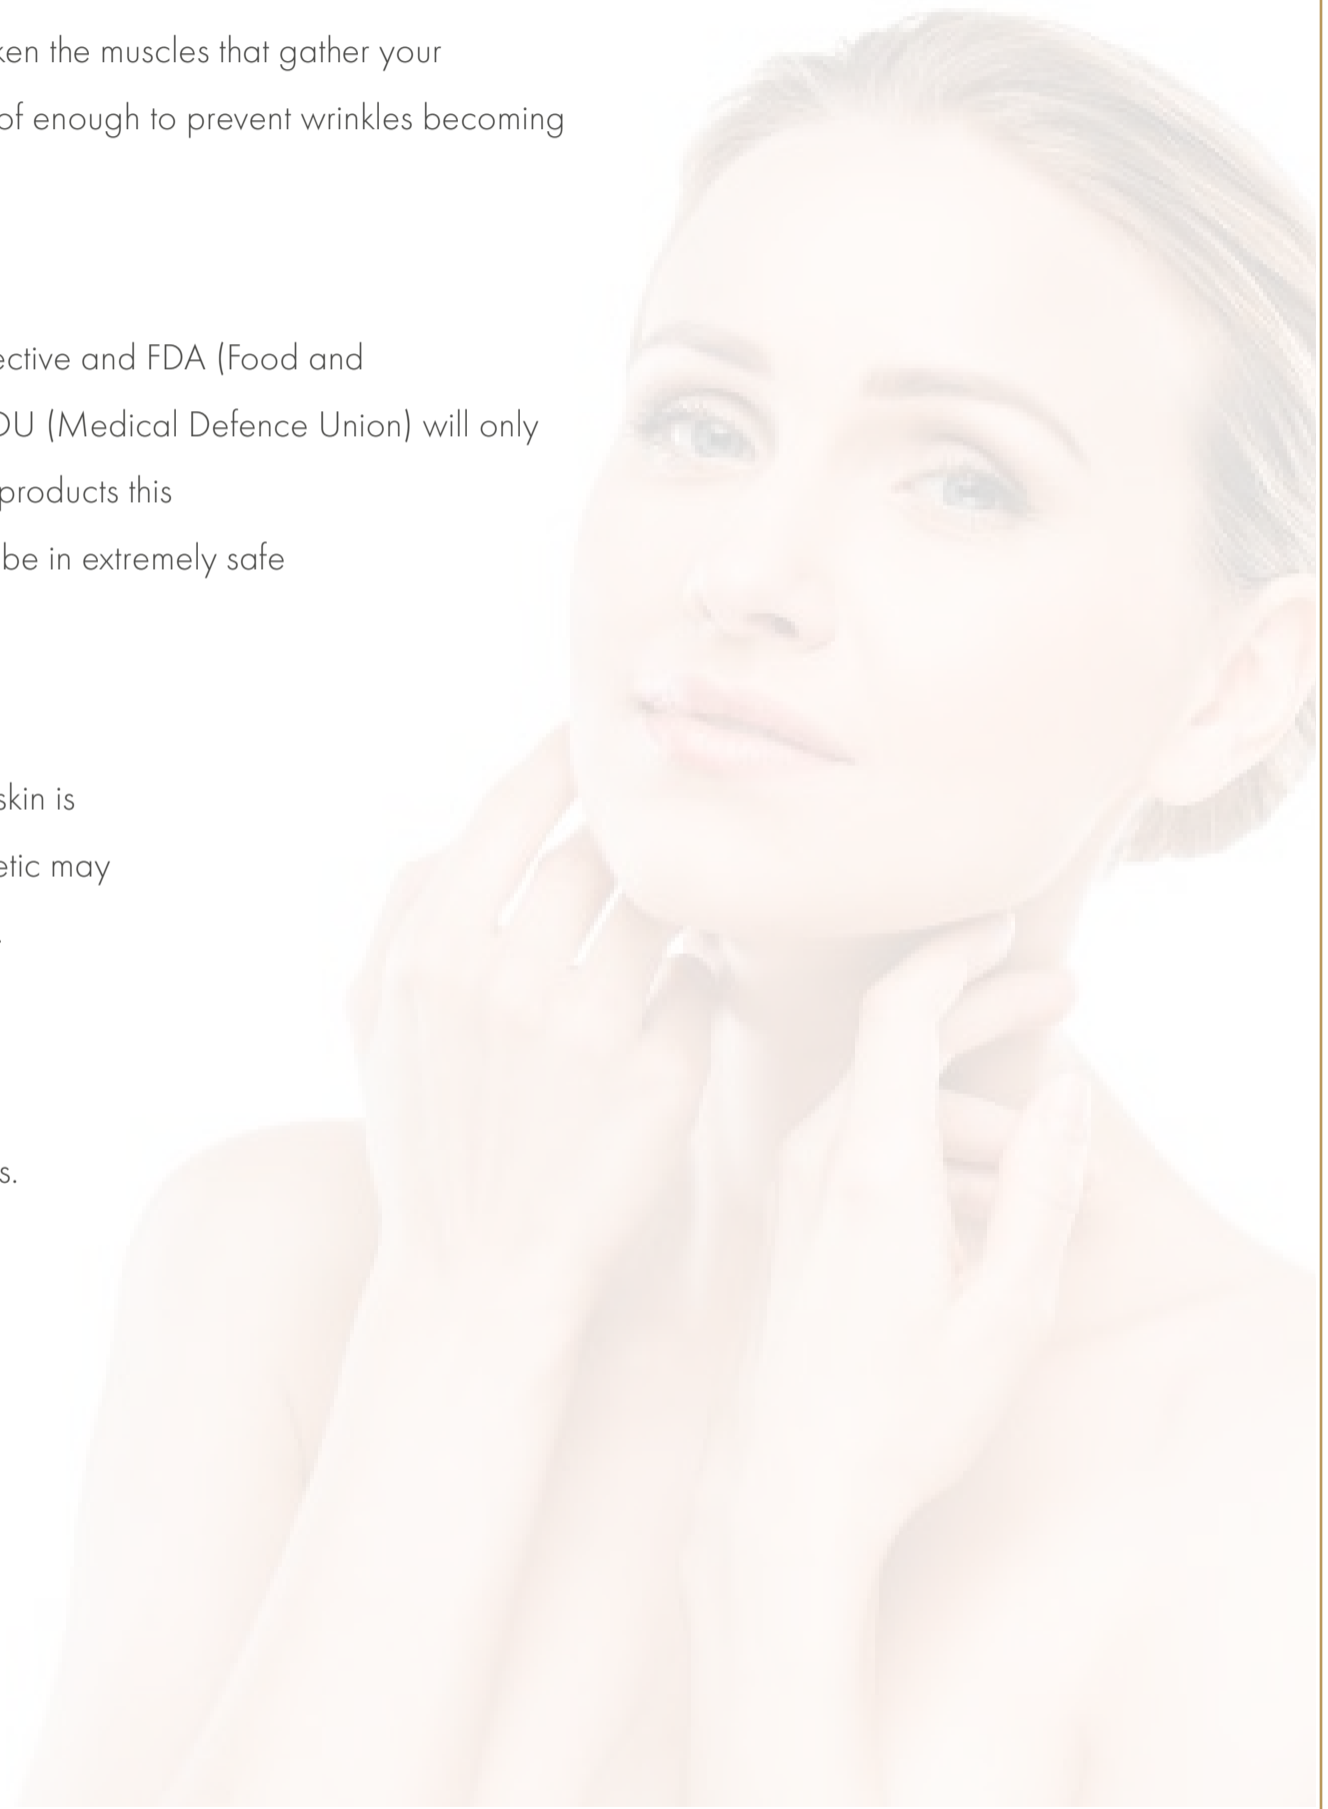

The treatment is virtually painless. If the skin is particularly sensitive, a topical anaesthetic may be applied 30-60 minutes beforehand.

When will I notice results?

Results of this treatment are immediate but the full effect can take up to 14 days.

How many treatments will I need?

This can vary from patient to patient and the results are not permanent. You will need to maintain your results with additional injectable treatments.

TREATMENTS

ANTI-WRINKLE

Bunny Lines Treatment

Here at HC MedSpa, our in-house doctor, Dr Samia Hussain uses a very small amount of Botulinum Toxin; a naturally purified protein, that works as a muscle relaxant. The substance is placed under the skin via a micro-injection and targeted at either sides of the nose; directly into the fine wrinkles. This technique will essentially weaken the hyperactive muscle that is responsible for creating the light folds.

Procedure time: 20-30 minutes

Cost: From £80

Gummy Smile Correction

The non-invasive, Gummy Smile Correction treatment is a very discreet yet effective procedure and depending on the individual, we expect to create between 3-6 micro-injections per treatment. Visible improvement is noticed after 3 days, this is when the elevation of the upper lip will gradually become less and less. However, the final result is achieved up to 14 days post-treatment.

Procedure time: 20-30 minutes

Cost: From £280

Dimpled Chin Treatment

The Dimpled Chin Treatment uses a series of micro-injections of Botulinum toxin; a naturally purified protein, it works as a muscle relaxant to weaken contracting facial muscles. In this case, it blocks the chemical signal from the nerves that's responsible for giving the chin a 'pebbled' effect.

Procedure time: 20-30 minutes

Cost: From £280

Jawline Slimming - Teeth Grinding

Dr Samia Hussain uses a very small amount of Botulinum Toxin; a naturally purified protein, that works as a muscle relaxant. The substance is placed under the skin via a micro-injection directly into the masseters muscle which leads in-turn to a reduction in the overall jaw size.

Procedure time: 20-30 minutes

Cost: From £350

Nefertiti Neck Lift

The Nefertiti Neck Lift is a specialised technique using micro-injections of Anti-Wrinkle product (BOCOUTURE®) to improve the definition of the jawline, rebalance the underlying muscles and provide 'lifting' in the neck and jaw area.

Procedure time: 20-30 minutes

Cost: From £350

DERMAL FILLERS

Dermal Fillers are now a quick and convenient way to define facial contours, restore lost volume in cheeks, plump eye hollows (tear trough treatment), reduce the appearance of veins and tendons, enhance lips and correct bumps on the nose for a smooth appearance.

What are Dermal Fillers?

Facial fillers vary in their composition, but the most commonly used material is hyaluronic acid – a naturally occurring substance within the body.

Is the treatment safe?

All our cosmetic injections are safe, effective and FDA (Food and Drug Administration) approved. The MDU (Medical Defence Union) will only insure doctors who use FDA approved products this provides further assurance that you will be in extremely safe hands.

Are Dermal Fillers painful?

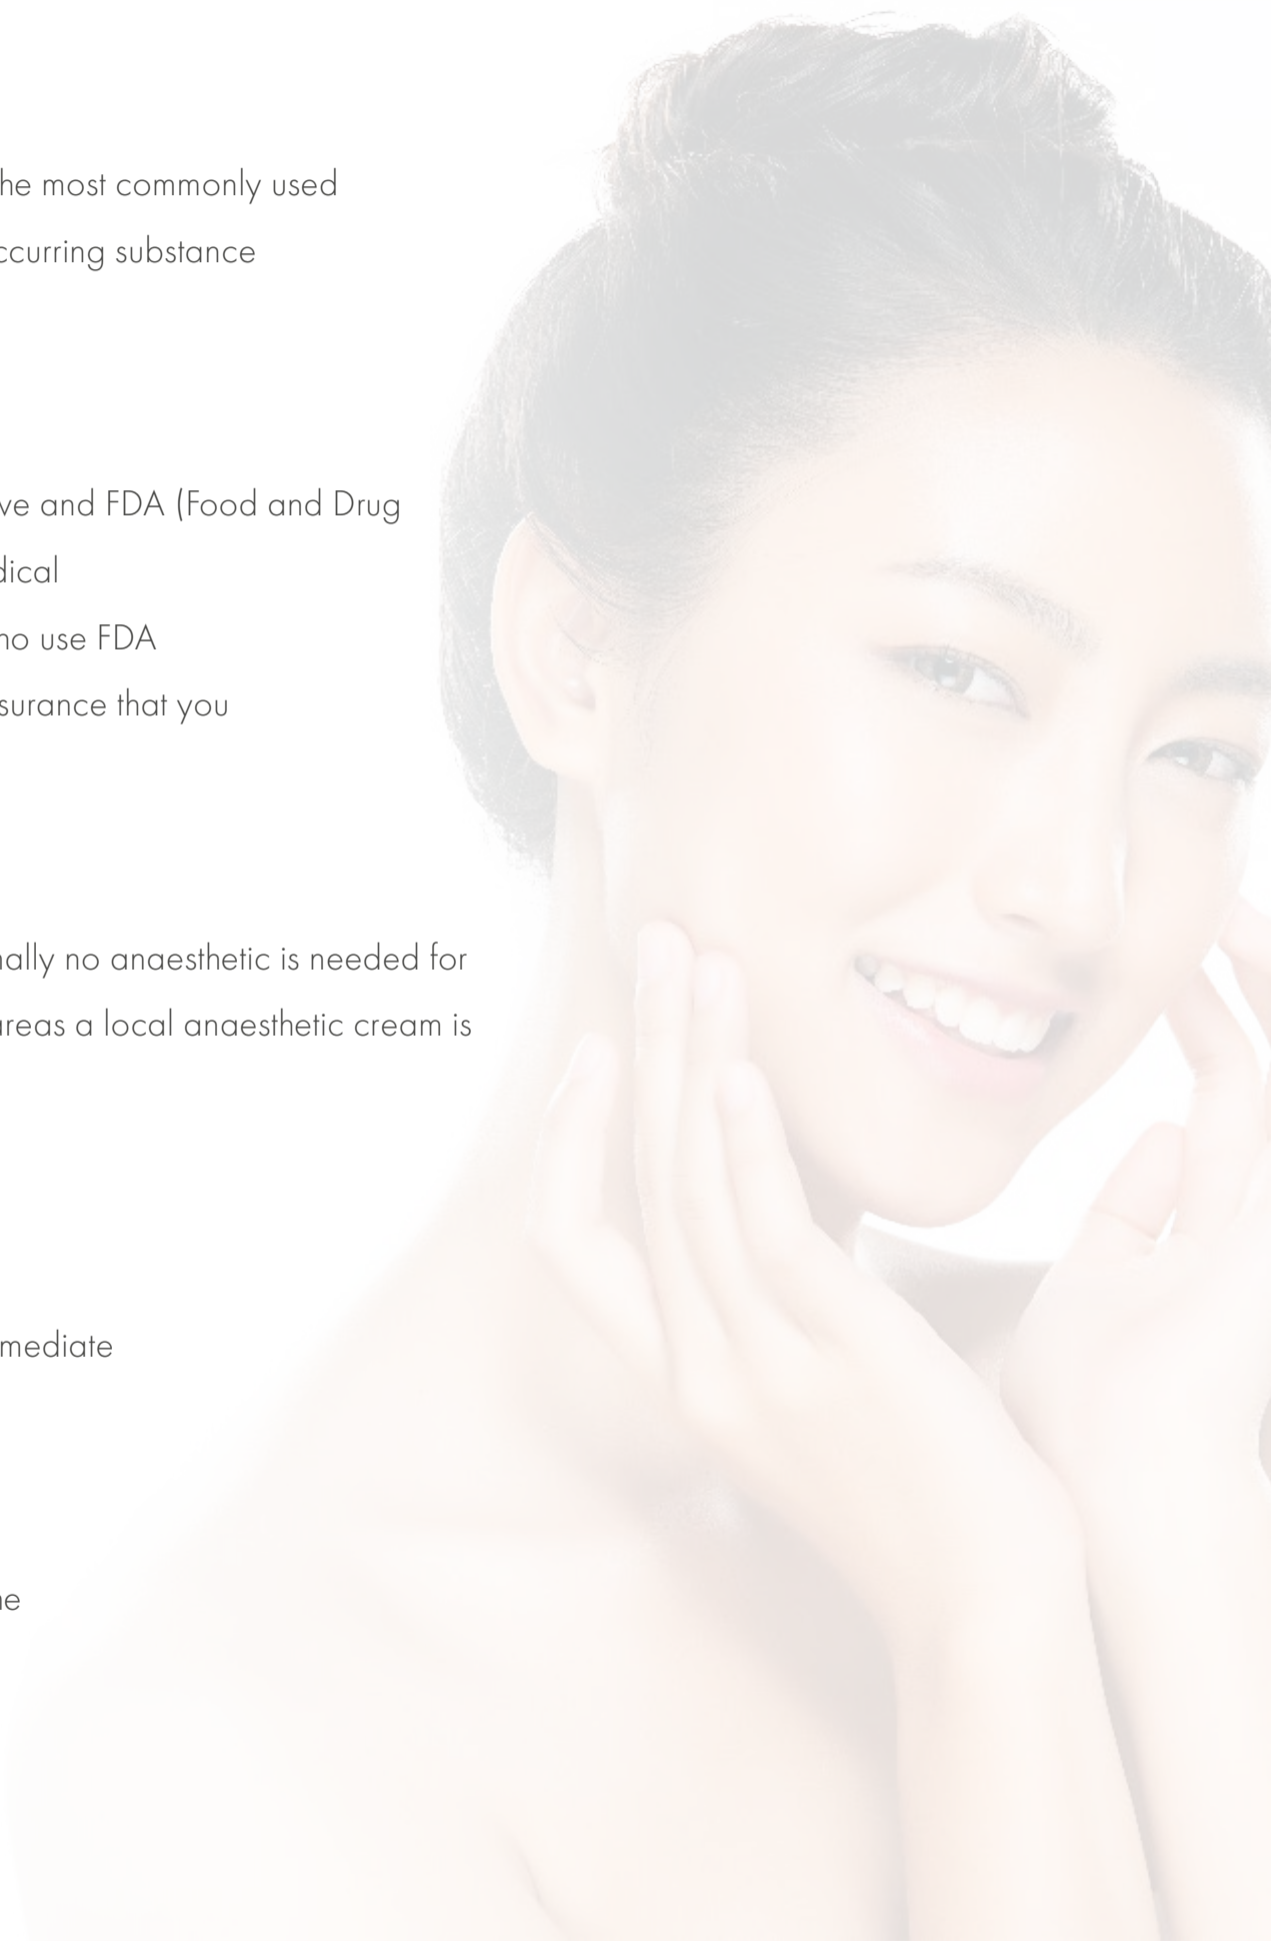

The injections may scratch a little, but normally no anaesthetic is needed for wrinkles and folds. For the more sensitive areas a local anaesthetic cream is normally applied half an hour prior to treatment.

When will I notice results?

Results of the dermal filler treatment are immediate but the full effect can take up to 14 days.

How many treatments will I need?

This can vary from patient to patient and the results are not permanent. You will need to maintain your results with additional injectable treatments.

TREATMENTS

DERMAL FILLERS

8-Point Facelift

The 8-Point Facelift restores volume in eight strategic areas by injecting Dermal Fillers into the face to lift and ensure an overall facial rejuvenation. Results are instant with no downtime.

Procedure time: 30-60 minutes

Cost: From £1000

Chin Enhancement

Chin Enhancement, more commonly known as 'Chin Shaping' or 'Chin Filler' is a non-surgical treatment designed to improve the shape or soften minor irregularities of the chin using Dermal Filler injections.

Procedure time: 30 minutes

Cost: From £350

Cheek Enhancement

Cheek Enhancement, more commonly known as 'Cheek Fillers' is a non-surgical treatment designed to lift, define and contour the shape of the cheeks for a projected 'cheek bone' appearance using Dermal Filler injections.

Procedure time: 30 minutes

Cost: From £350

Lip Enhancement

Specifically developed to enhance the lips, our Lip Enhancement treatment uses a small injection filled with Dermal Filler; which is essentially a manmade gel that mimics the body's natural hyaluronic acid. It is injected directly into (both or either) the border and cushioning of the lips to plump and define the shape for a natural and more rejuvenated look.

Procedure time: 30-60 minutes

Cost: From £350

Non-Surgical Rhinoplasty

This treatment uses an injectable Dermal Filler to balance out the nose and facial profile. It does not reduce the size of the nose, it is a non-surgical procedure simply used to correct small bumps, humps and dips on the bridge of the nose.

Procedure time: 30-60 minutes

Cost: From £350
